

The background of the entire page is a dark grey or black, featuring a complex, repeating pattern of concentric chevron lines. These lines are arranged in a series of nested V-shapes that point both upwards and downwards, creating a sense of depth and movement. The lines are lighter in color than the background, possibly a light grey or off-white.

INNOVATION, EXPERTISE AND STYLE.

GEAR UP FOR YOUR BEST PERFORMANCE!

GEARXPro is an Italian company that manufactures sports products. The company produces grip footwear and innovative sports items for professional, amateur or leisure activities. It is one of the largest manufacturers of grip socks in the world. The company's success derives from constant product innovation. GEARXPro has been able to patent most of its items through continuous research and direct study with industry professionals, allowing the company to differentiate itself from other competitors on the market. The brand logo, that is present in all products, is personally designed by one of the two founding brothers of the company, Cristian Di Leo. This identification and characteristic also appears on the official company logo. GEARXPro currently distributes its products in more than 20 countries around the world.

GEARXPro's vision is to create innovation in sport, taking the enthusiast to a more advanced level, with the awareness that anyone who dedicates his time and his life to sport must have the opportunity to feel like a winner. The goal is always to improve through continuous research and development of increasingly innovative products for amateurs and professionals in the world of sport to improve their performance.

When we think of a new product, we follow these two guidelines. The first is to create a product that is innovative and that helps athletes, professional and non-professional, to significantly increase the level of their performance when they play sports. For us, in fact, there is no distinction between professional and amateur athletes: for us what counts are the passion and the desire to feel like a winner, in any sport and at any level. Our products are at the service of this idea: a virtuous idea that needs quality products, like ours. The second, equally important, is respect for the environment. The time we live in and that we are about to live is strongly characterized by the environmental issue, which is often spoken about but which then is not always implemented into concrete facts.

Here, instead, we like to talk with facts, developing environmentally friendly products, using, for example, components made from recycled plastic. All those who wear our products, therefore, become ambassadors of the message of eco-sustainability and recycling, two absolutely fundamental concepts that are relevant today as never before.

SOXXPro®

STABILITY, PRECISION AND COMFORT IMPROVE YOUR PERFORMANCE, CHOOSE SOXPRO

The **SOXPro Grip socks** have been designed to offer maximum traction inside your shoes. The SOXPro sock is characterized by the presence of anti-slip pads in the shape of an arrow. The arrows are made with high quality silicone and generate a Grip: IN action that does not allow any slipping inside the shoe.

The fine silicone arrows are present not only on the sole of the foot but also in the strategic area of the heel. In this way they prevent the annoying lateral and vertical movements that occur inside the shoe when practicing 90% of sports.

In sport, speed is essential, but it is not the only factor that matters. The ability to jump sideways, abruptly change direction and slow down quickly are equally important. SOXPro has been designed to support you during these moments of performance by reducing the friction between the sole and the shoes. While practicing sports you will be free to concentrate on running, movement and strategy.

- Greater comfort and protection of the foot and its arch
- Extraordinary feeling of stability while running
- Increased speed and explosiveness in the change of direction.
- Reduction of distortions caused by lateral displacement
- Reduction of micro movements that occur when practicing any sport
- The Grip: IN action on the heel prevents blisters caused by the sock slipping on damp skin.

The Innovation Award for Brand Quality

PLUS X AWARD 2021

PLUS X AWARD

The Plus X Award is the biggest and most prestigious award in the world dedicated to innovation in the technological field, for sport and lifestyle. Only brands that stand out in terms of the quality and innovation of their products are awarded. In 2020 SOXPro obtained this prestigious recognition in the High Quality, Functionality and Ergonomics categories, thus certifying the quality of unique products on the market.

CLASS 1 MEDICAL DEVICE

The CE conformity verifications and the EU Declaration of Conformity, in compliance with the relevant provisions of Regulation (EU) 2017/745 of the European Parliament and of the Council, certify that GearXPro products are **Class 1 Medical Devices** as they meet the general requirements safety and performance of the European regulation on medical devices 2017/745. The SoXPro socks therefore become **the first grip socks on the market to be certified medical devices**, confirming that GearX-Pro products represent the result of years of study and research, are able to generate benefits not only in terms of performance but also in accident prevention and muscle recovery.

The purpose of this study was to analyse the potential benefit SOXPro anti-slip performance socks may have on acceleration, agility and reaction performance in professional male and female footballer players.

SPRINT PERFORMANCE STUDY

20-Metre Acceleration Times

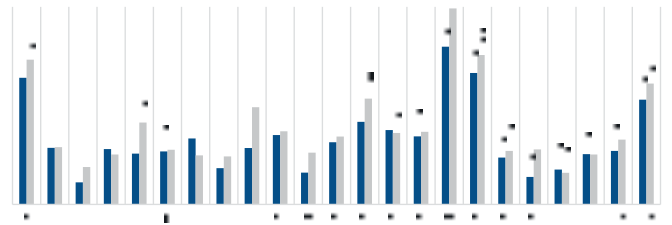

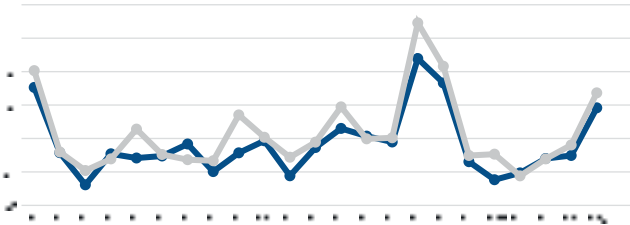

Control socks

3.13

SOXPro

3.07

+0.06

A consistent, significant improvement for such a brief anaerobic test. The SOXPro may play an important role in decreasing excessive movement of the foot within the football boot and consequentially improve foot contact leading to more responsive stance phase.

AGILITY PERFORMANCE STUDY

5-10-5 Pro Agility Test

Control socks

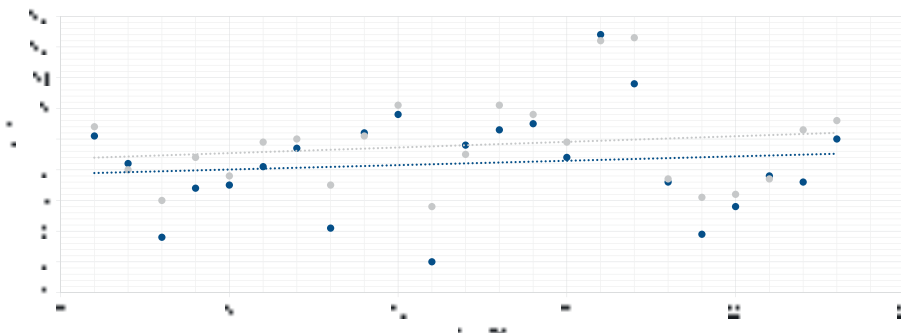

4.88

SOXPro

4.82

+0.06

The graph clearly demonstrates the small yet significant reduction in pro agility test times recorded with the SOXPro.

An average improvement of 6 one hundredths of a second. Whilst this might appear relatively small, considering the brief test protocol, **this is an important test result concluded.** A small yet consistent improvement in a short protocol such as the pro agility test might amount to a more apparent and significant improvement in change of direction over greater distances.

REACTION PERFORMANCE STUDY

Blazepod Fast Feet Score

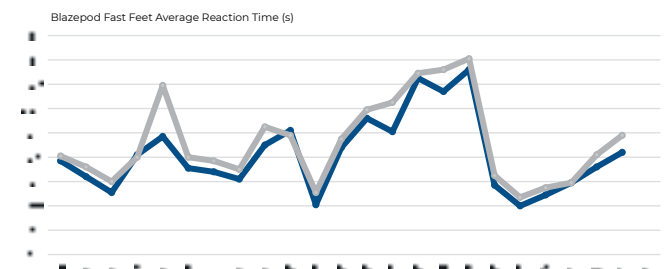

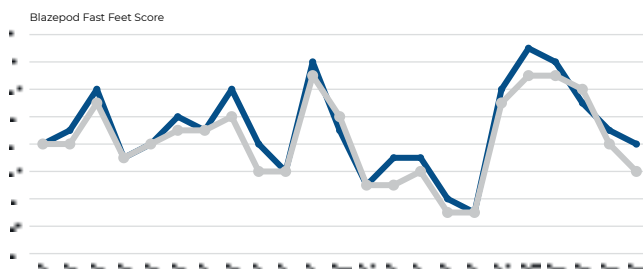

Control socks

0.532

SOXPro

0.542

-0.01

The mean Blazepod Fast Feet score for the SOXPro was 36 with an average reaction time 0.532. Whilst the mean score for the control group was 35.26 with an average reaction time of 0.542. **An standard decrease in reaction time of one, one-hundredths of a second.**

SOXPro[®] CLASSIC

RECOMMENDED FOR
ALL SPORTS

HIGH PERFORMANCE WITH **ANTI-FRICTION SPORTS SOCKS**

- 1/ Design studied for comfort and stability;
- 2/ Ideal breathability and evacuation of moisture;
- 3/ The silicone arrows allow an increase in performance in agility and speed;
- 4/ Elastic band on the ankle and foot for greater stability;
- 5/ Differentiated design on left and right foot;
- 6/ Lightweight sponge to cushion shocks;
- 7/ MEDICAL DEVICE CLASS 1: Injury prevention thanks to reduced joint stress.

Stability, precision and comfort. The SOXPro Grip socks have been designed to offer maximum traction inside your shoes. The SOXPro sock is characterized by the presence of anti-slip pads in the shape of an arrow. The arrows are made with high quality silicone and generate a **Grip: IN action** that does not allow any slipping inside the shoe.

MADE FROM POST-CONSUMPTION PLASTIC BOTTLES

New Life X Dry is a synthetic textile fiber **created with recycled plastic bottles, collected in Europe**, through a certified process. An ecological polyester that exploits existing and abundant resources such as plastic, to obtain an ecological, high quality, and sustainably produced fiber. The threads of the "X Dry" fiber, by virtue of the modified section, favor the passage of sweat from the skin to the outside of the fabric. This performance is ensured by the presence of microchannels on the filaments, which accentuate the phenomenon of capillarity. The elimination of sweat facilitates the body's natural thermoregulation mechanism. **The production process is 100% Made in Italy and 100% traceable.**

SOXPro® ANKLE SUPPORT

RECOMMENDED FOR
RACKET SPORTS

THE ULTIMATE TENNIS SOCKS

- 1 / MEDICAL DEVICE CLASS 1. Injury prevention thanks to reduced joint stress;
- 2 / XCROSS-YARN. Maximum ankle support through multi-material construction and strategic reinforcement straps;
- 3 / 360° CUSHION. Total reinforcement of the toe, made of light foam, for shock absorption.
- 4 / GRIP:IN. Increased performance, agility and speed thanks to the silicone arrows;
- 5 / PROTECTION. Increased protection of the heel area and prevention of blisters;
- 6 / COMFORT AND STABILITY. Anatomical fit and mix of high quality materials for maximum comfort and stability;
- 7 / INNOVATIVE DESIGN. Different design on the left and right foot.

The SOXPro Ankle Support FF, designed in collaboration with **Italian champion Fabio Fognini**, is the first grip sock designed specifically for racquet sports. A combination of comfort and perfect performance that allows the athlete to take full body control. **XCross-Yarn**, the part that makes up the entire ankle area, thanks to its multi-material composition and the presence of strategic reinforcement bands, drastically reduces the risk of sprains and stress on the joints.

SOXPro® FAST BREAK

RECCOMENDED FOR
INDOOR SPORTS

FAST BREAK IS AN ATTITUDE

- 1/ MEDICAL DEVICE CLASS 1. Injury prevention thanks to reduced joint stress;
- 2/ GRIP: IN. The silicone arrows offer maximum power transfer with maximum comfort;
- 3/ New design of the final upper part of the sock with a fin shape extension of the fabric;
- 4/ Greater breathability of the fabric on the shinbone area;
- 5/ Optimal protection of the Achilles Tendon and maximum support of the ankle;
- 6/ Microcushion technology offers optimal shock absorption and maximum comfort of the sole of the foot;
- 7/ The hexagonal shaped texture is designed to offer compression, ensuring optimal protection of the area concerned;
- 8/ The thicker fabric construction on the instep improves shock absorption;
- 9/ Differentiated design between left and right foot.

The innovative structure of the SOXPro Fast Break is characterized, in addition to the presence of anti-slip pads in the shape of an arrow, by a **compressive fabric in the ankle area**. The absolute novelty is represented by the **introduction of GRIP: IN technology (in the world of basketball)**, which combined with the multimaterial composition of the sock, reduces the risk of distortion and the stress of the joints ensuring greater stability, speed and precision.

SOXXPro® FIVE TOE

RECOMMENDED FOR
ALL SPORTS

EXTRAORDINARY FEELING

- 1 / CLASS 1 MEDICAL DEVICE. Prevention of accidents due to reduced stress on the joints and muscle sparing;
- 2 / All toes move independently to allow for a firmer grip on the ground;
- 3 / Increased performance and increased stability, agility and speed due to the silicone arrows;
- 4 / It adapts to the shape of the foot and to each of its toes to improve support;
- 5 / Extraordinary feeling of stability during the entire duration of the activity;
- 6 / Significant improvement in stability and control, net reduction of micro-movements;
- 7 / Ideal breathability and optimal moisture evacuation;
- 8 / Thanks to the protection of each toe, chafing and blisters are limited;
- 9 / Innovative differentiated design on right and left foot.

The **SOXXPro Five Toe** is the new GEARXPro Sports sock **designed to subvert the athlete's playing experience**. The characteristic trait of the sock is represented by the freedom of movement of the five fingers which allow for a firmer grip on the ground. The fit adapts perfectly to the shape of the foot and to each of its toes to favor support and thrust when changing direction. Thanks to the protection of each individual toe, rubbing and blisters are limited.

RELAX WITH SOXPRO RECOVERY

SOXPro Recovery socks guarantee **high compression** at the height of the ankles and calves which **promotes blood circulation for faster muscle recovery**. More and more professionals are using this type of products to recover faster from workouts and competitions, reducing muscle pain and limiting post-training swelling.

SOXPro Recovery **avoids the accumulation of lactic acid** in the calf muscles, delaying fatigue and drastically reducing recovery times. Can be used in pre-activity to speed up warm-up or immediately after performance to **reduce recovery times**.

The **Dryarn® yarn**, light, insulating and breathable, offers **greater ventilation** of the foot and optimal comfort. This material consisting of polypropylene micro-fibers used in intimate products, sports products and technical applications guarantees the highest quality performance. SOXPro Recovery socks have no seams.

In the area of the Achilles tendon there is the **X-Stability Sytem** which provides protection and stability to the heel, tendons and ankles. This structure guarantees the correct fit and the correct position of the ankle.

The pressure varies between ankle and calf thanks to the different tension in each point and acts as a sort of massage on the skin and in depth on the muscles, promoting blood circulation and **greater oxygenation** of the tissues.

It is measured in mmHG, that is millimeters of mercury, and is highest in the ankle area (20 mmHG) and then gradually decreases to the calf (12 mmHG). The pressure must be greater on the ankle to ensure proper blood flow from bottom to top.

SOXPRO RECOVERY

● BLACK

GEARXXPro®

RECOVERY

BEFORE AND AFTER PERFORMANCE REGENERATING EFFECT FOR OPTIMUM RECOVERY

Recovery is the key element in achieving top performance in competitive sports. Only those who can to **recharge their energy** in the best way will be able to achieve high performance in a long run.

GEARXPro Recovery technology, based on **graduated compression** and the use of an innovative **ERGON+ yarn**, allows intelligent and precise recovery.

The compression, aimed at specific parts of the body, **stimulates blood circulation** ensuring a constant sensation of freshness in the legs. The technology of the product allows for the elimination of toxins, guaranteeing **less muscle pain** and new energy in a short time. The novelty lies in the use of the innovative ergonomic Ergon+ yarn, which respects the most sensitive skins, avoiding the occurrence of allergies and supporting microcirculation and keeping the skin constantly fresh and dry. The GEARXPro Recovery Long (or Half) Tights, are to be considered an **ergonomic product** in its fullness, as they can be worn in life and in everyday moments, making recovery on the move more reachable.

The innovative production technique used by our companies allows, thanks to a **special medical grade machinery**, to control with the compression profile, guaranteeing the maximum increase in blood flow for faster recovery. The combination of the production technique and the use of the innovative Ergon + yarn give life to a completely ergonomic product, which favors compression in the targeted areas of the body and helps the wearer more easily.

BENEFITS

- 1 / *Faster recovery*
- 2 / *Reduced muscle stiffness*
- 3 / *Pain relief*
- 4 / *Reduced Swelling*
- 5 / *Regenerating effect*
- 6 / *Maximum Comfort*

Ergon+ is an innovative high-performance yarn designed exclusively for garments that are practical and comfortable to wear. Ergonomic, Breathable and Lightweight: Ergon + is the best athlete performance enhancer.

Quick drying

The yarn that uses the most sensitive skins avoids the occurrence of allergy phenomena and the proliferation of bacteria. The innovative, durable, high-quality Ergon + yarn uses body heat to support microcirculation.

GEARXPro® RECOVERY

compression
20-30 mmHG

GRADUATED COMPRESSION FOR FASTER MUSCLES REGENERATION AND PAIN REDUCTION

- 1/ GRADUATED COMPRESSION. Improves blood flow in the ascent path from the legs to the heart;
- 2/ RIB KNIT for greater progressive elasticity;
- 3/ Extra strong and precise graduated compression pressure;
- 4/ Optimal thermoregulation thanks to the breathable Ergon + fiber;
- 5/ Anatomical fit and mix of high quality materials for maximum comfort;
- 6/ LIGHT | BREATHABLE | INSULATION: Manufactured with high performance, designed for exceptional fit and durability.

70% NYLON | 30% SPANDEX

FLEX-GXPro®

A NEW LEVEL OF PROTECTION

The FLEX-GXPro shin guards offer a **360° level of protection**, with **maximum shock absorption** to ensure maximum safety! By combining the use of **NSG GEL** with **Antishock+ technology**, our shin guards are also characterized by being **super light and thin**.

Lightness, flexibility, stability and 360 ° protection

The FLEX-GXPro shin guards are **100% adaptable** to the physical characteristics of the athlete and, with a weight of only 55g, they are **50% lighter than all other shin guards on the market**. They also guarantee shock absorption equal to 20% more than the competition, confirming themselves as a product ready to completely revolutionize the concept of the shin guard itself.

A quality product made with quality components.

The FLEX-GXPro shin guards guarantee comfort, protection and a personalized fit during your performance on the court. The key feature is represented by the uniqueness of the materials used in the development phase. The external surface features Antishock+ technology, a real innovation in the football field, since these are the same technical specifications that cover the protections used by motorcyclists. Our shin guards reduce the vibrations that are perceived by athletes during game clashes and which many times are the cause of shorter or longer injuries.

The internal surface, on the other hand, is covered with a **3D Grip** texture that offers total traction in contact with the skin. A texture made with Gel NGS, a patented thermo-plastic gel capable of providing maximum elasticity and absorbing the shocks caused by game clashes. The 3D Grip perforated texture has a three-dimensional behavior: upon receiving the blow, it does not simply compress but expands to absorb as many forces as possible. Our shin guards have been tested in the laboratory and have been approved by numerous athletes for their high comfort and the attractive design that distinguishes them.

20%+

Shock absorption compared to traditional plastic or carbon shin guards.

30%+

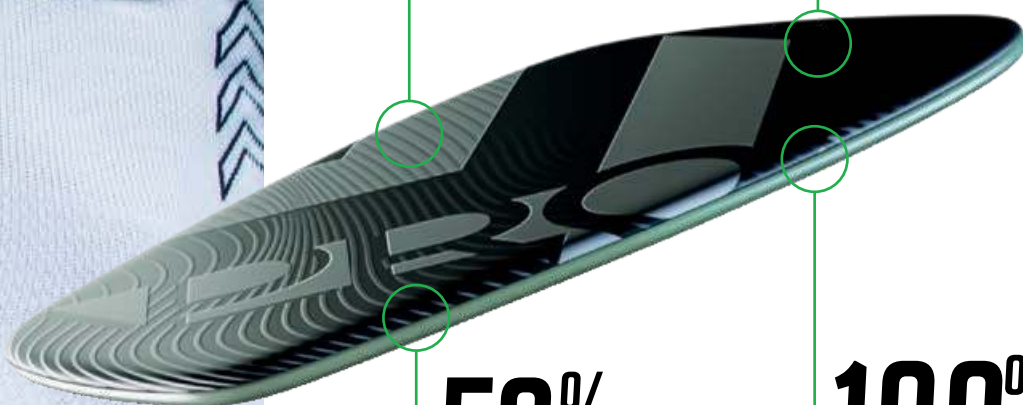

More resistant than traditional carbon shin guards.

50%+

Lighter than traditional plastic shin guards.

100%

Total flexibility for perfect adaptation to the tibia without the use of any support.

Gel Revolution

FLEXIBILITY AND PROTECTION FOR YOUR PERFORMANCE

- 1/ The antishock + technology is present on the outer side of the shin guard, ensuring a 360 ° level of protection never experienced before;
- 2/ The NSG gel is a real revolution, it is a patented thermoplastic gel that guarantees maximum shock absorption;
- 3/ 3D perforated texture: the shin guards will remain well adherent to the skin, avoiding annoying movements under the sock;
- 4/ Ink. A modern design that resists wear and maintains its brilliance thanks to the particular molecular structure of the applied ink;
- 5/ Features: the weight is only 55gr and the thickness of 7mm.

AREA A	30,7	AREA A : 31 AREA B : 29,489 AREA C : 31,83
AREA B	47,3	AREA A : 56 AREA B : 41,493 AREA C : 44,941
AREA C	55,2	AREA A : 58 AREA B/C : 52,25

TOTALLY FLEXIBLE, ULTRA PROTECTIVE

Thanks to the Antishock + technology, present on the external side of the shin guard, FLEXGXPRO ensures greater impact resistance than any traditional shin guard in plastic or carbon material. A shin guard capable of combining exceptional comfort with a 360 ° level of protection.

Requirements for the "impact performance level" test according to EN 1621-1: 2013, ref. 5.4

Protection level 1: the mean peak value measured must be less than 35 kN.

No single peak recorded value must be greater than 35kN.

No single peak recorded value must be greater than 50kN.

LACE>XPro®

LACE UP YOUR BEST PERFORMANCE

LACEXPro improves your performance and makes you stand out from the crowd. **Prevention, Stability and Compactness.** The **silicone XPro Cage** allows you to make micro-adjustments on the laces. This feature offers stability and compactness during sports performance and prevents annoying slipping inside the shoes that often cause injuries.

Dominate your performance while playing sports and take advantage of the silicone coating that surrounds the LACEXPro laces.

WATERPROOF

Forget laces that get heavier with rain and mud. The silicone XPro cage is water repellent and gives you the ability to keep your shoes light in any weather!

The silicone XPro Cage allows you to make micro-adjustments on the laces.

TUBEXPro®

THE TIME TO STOP AND REPOSITION THE SHIN GUARDS IS OVER

- 1/ ENERGY + technology. Thanks to ENERGY + technology, you will experience a feeling of exceptional comfort from the beginning to the end of sports performance;
- 2/ Breathable fabric. Our TUBEXPro are made with a breathable fabric that allows you to keep your skin dry throughout the performance;
- 3/ Lightness. The lightness that distinguishes our TUBEXPro allows you to wear them in all seasons, guaranteeing you the right temperature during the performance;
- 4/ Slim seamless design. Our TUBEXPro are designed to ensure durable use, without worrying about breakage or deformation;
- 5/ Easy to put on and remove in seconds with no problem.
